

When are permits required?

Permits are required when:

- the load size exceeds statutory limits
- the gross vehicle weight exceeds 80,000 lbs.
- individual axle weights exceed legal limitations

Are all loads exceeding size or weight limits eligible for a permit?

Generally only non-divisible loads, those that cannot be broken into smaller loads, are eligible for the permit. There are some exceptions authorized by Wisconsin Statute 348.27.

How are permits obtained?

Permits may be obtained:

- at the Motor Carrier Services counter in Madison
- by mail
- by wire service
- or with prior authorization, by phone, or internet

Are there different types of permits?

Yes. Carriers who frequently haul oversize or overweight loads can apply for an annual permit. Special annual permits exist, e.g., garbage loads, recyclable scrap, forest products, and others. Carriers who occasionally haul oversize or overweight loads can purchase a single trip permit.

Do carriers choose their own routes?

Annual permit holders can choose their own routes. Single trip permits list a specific route which is reviewed by the DMV based on road and bridge width, height, weight and construction limitations. Carriers must stay on the assigned route.

Are carriers required to have insurance?

Yes. Carriers must certify that insurance is in effect in the amount required for the size and weight of the vehicle/load being transported.
